PAGE 2 MOUNTING

PAGE 3 INSTALLED LED SNAP FRAME AND POSTER

INDEX

Post and Cover

STEP 1

Flip the snap covers on four sides of the frame outward. You will have access to the clear cover and the poster(s).

STEP 2

Peel the protective film (or brown paper) on the cover. If you have ordered the cover with grids, flip the cover. The grids should be faced up. Make sure the poster and the cover are in place.

STEP 3

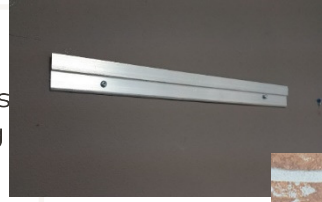

Close the four sides of the frame by snapping the covers inward.

Mounting

STEP 1

Your LED Snap Frame comes with two Screws for hanging or a French cleat (for large ones). Install the French cleat or the two screws on the wall, and make sure they are leveled.

STEP 2

Hang the light box on the wall, connect the dimmer (optional) to the light box and to the power supply and turn it on with the On/Off switch (optional) on the edge of the frame. Use the remote (optional) to dim the light.

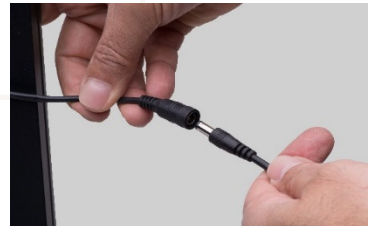

STEP 3

Plug-in Power Supply: *Male-female Connection*

Hardwire Power Supply: *Hardwire Connection*

Dimmable Hardwire Power Supply: *Hardwire Connection to a Wall Dimmer Switch*
